Leadwood Limousins Excel in World Championship

Leadwood Limousin-owned cattle, bred by La Rhone Limousins, achieved outstanding success at the “**Champion of the World**” competition, securing multiple awards. Competing against over **1,950** entries representing **16** breeds from **93** countries, this accomplishment highlights the **exceptional quality** and **global competitiveness** of Leadwood’s cattle genetics.

BOTSWANA

About the competition:

The “**Champion of the World**” Competition, established in 2012, aims to foster awareness, goodwill, and trade among cattle-producing nations. Cattle from the various breeds compete within four regions: North America, South America, Europe, and Asia / Africa / Oceania. Regional judges select winners who advance to the overall “Champion of the World” stage. Winning **bulls** earn the “**Champion of the World**” title, while winning **females** are crowned “**Miss World.**” The honour of being named a World Champion reflects excellence in breeding, feeding, preparation and presentation.

LEADWOOD LIMOUSINS GOLDEN SALE

15 MARCH 2025

Welcome!

Welcome to the **Leadwood Limousins Golden Sale 2025**. We are proud to present our **first production sale!**

Now in our ninth year since establishing the Leadwood Limousin stud, we continue to grow and improve our herd. Thanks to the **embryo programs** initiated in 2022, we have seen a significant rise in quality.

While our focus remains on building the herd to supply more bulls to both the **stud and commercial market**, we have decided to offer a **select group of stud females**. With ongoing border restrictions that prohibits the import of animals from South Africa, access to new genetics has been limited. We are therefore making female Limousins available to both existing and aspiring breeders so that we can **build the breed together**.

This sale presents a unique opportunity to acquire top-tier genetics, and we look forward to **welcoming you** and **sharing this milestone** with you.

Our Offer

For our **2025 Golden Sale**, we are offering 10 x LR 18-87 Zippo Semen Straws, 15 bulls and 35 females.

All animals descend from exceptional sires, including: **DL1421 Jacob, Wilzak PP12-2, LR15-65 Titanic, LR16-05 Vincent, LR16-69 Viceroy, LR18-87 Zippo, LW21-33 Casanova, LW21-34 Rocket, LW22-38 Boss, GSL19-32 Izon, XRL16-103 Normandy, DL13-143 Inspiration, and XRL15-59 Rainmaker.**

We have **four potential stud sires** available for consideration. Some of these bulls have already been used in our stud, and we will be retaining semen shares for our own use.

Our **hand-selected females** include proven breeding cows (2015–2019), younger first-calvers and heifers and two outstanding embryo heifers from the 2023 breeding season

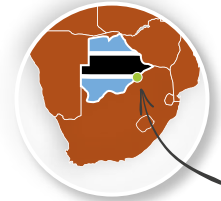

All females have been **pregnancy tested**, with only **two heifers open**.

Approved For Sale

All our animals were inspected and approved for sale under the auspices of the Limousin Breeders' Society of Southern Africa.

Visit us

The 50 Limousin Stud animals on offer will be available to view at **Lucerne Fields Farm, Martin's Drift Road, Sherwood** from **Wednesday, 12 May 2025**. It will be our pleasure to discuss the various animals with you in advance.

Golden SALE

The Limousins Breed

The Limousin breed is a medium-framed, early-maturing breed. Limousins have become popular because of their desirable carcass traits and the breed's production efficiency, attributed to the F94L myostatin gene or "Profit" gene.

The Limousin is an ancient breed from the rugged, hilly south-central France characterised by poor soils, hot summers and severe winters. The animals produced beef under pastoral conditions and were used in agriculture as draught animals. The breed's hardiness is also proven in Africa, where they are very well adapted to the varied climate and production conditions they are exposed to.

ABOUT LEADWOOD LIMOUSINS

Leadwood Limousins are bred in the Tuli-Block, an endemic heartwater area. We use Limousin bulls for crossbreeding in our commercial herd, which consists mostly of Brahman cattle, to enhance the meat yield on Brahman carcasses.

We aim to breed well-muscled, well-balanced medium-framed bulls of outstanding quality and presence. Masculinity, movability, hardiness and robustness are vital to us.

We aspire to breed fertile females with excellent mothering capabilities and sufficient milk yields of good quality to raise solid and lively calves.

THE LEADWOOD LIMOUSIN GUARANTEE

Leadwood Limousins take great care in marketing quality animals that you can be proud of:

Animal Health

The Leadwood Limousin stud is vaccinated against anthrax, botulism, black quarter, lumpy skin disease and Pasteurella. All animals are treated against internal and external parasites. Vetswana conducts bull fertility tests and issues certificates.

Estimated Breeding Values (EBVs)

At Leadwood Limousins, we keep detailed records of our animals to ensure that we offer Estimated Breeding Values (EBVs) for a range of essential production traits (e.g. weight, carcass, fertility). These EBVs provide objective information on the animals we are selling so that you know what you are buying!

DNA profiling

All of our animals are DNA-profiled, also known as "genotyping", to confirm the parents of a specific animal. DNA-based parentage testing allows for correct individual identification of animals, ensuring a unique, permanent DNA ID for traceability.

Animals approved for sale

All our animals are inspected and approved for sale by the Limousin Cattle Breeders Society of Southern Africa. This process ensures that when you purchase a Limousin from us, you can be sure it complies with the breed standard.

10 reasons to choose Leadwood Limousins

Mabaka a le lesome a a ka go gwetlhang o le morua-kgomo go tlhopha kgomo ya LEADWOOD LIMOUSIN

1

Genetically produces more meat E na le nama e ntsi ka tlholego

Distinguishing the Limousin breed from all other breeds is the presence of the F94L myostatin "Profit" gene. This gene variant naturally increases meat production by 20% without artificial growth hormones. The Limousin carcass has a high meat-to-bone ratio and dress-out between 65 and 70 per cent. Therefore, "Much More Meat" means "Much More Profit"!

2

Improve commercial cattle with the hybrid vigour of crossbreeding Fa e kopantswe le mefuta e mengwe ya dikgomo e a di tlhabolola motlhofo

Limousin bulls are the bulls of choice when crossbreeding with local indigenous breeds such as Brahman, Beefmaster, Bonsmara etc. Crossbred calves benefit from the hybrid vigour and the presence of the F94L gene, which is transferred to the progeny (offspring). Limousin bulls are often used to open heifers of breeds with large calves, e.g. Charolais, because of the small calving characteristic of the Limousin breed.

3

More efficient with less feed E dira ka natla e sa jesiwe mo go kalokalo

The Limousin breed has an excellent average daily gain and feed conversion ratio. They are good foragers, ideal for grass-fed beef production, achieving more meat per hectare. They are the ideal choice for feedlots since they need less feed to produce more meat, and they can be fed longer before putting on excess, unwanted fat.

4

Easy calving with small calves E tsala marole aa lekanetseng mothofothofo

The breed is renowned for producing small, vibrant calves which are light at birth leading to minimum calving problems, less neonatal mortality and fewer veterinarian expenses. They grow rapidly after birth, weaning at weights well above international beef industry averages.

5

Fertile with sufficient milk production Ke kgomo ee letsalo e bile ena le masi a mantsi

The Limousin cow has good mothering capabilities, producing more than enough milk for strong, beefy calves. Many large herds have an inter calving period of 370 – 380 days.

6

A long, productive life E tshela lobaka gape e na le maduo

The longevity of Limousin cows is considerable. The morphology of female cows reaches its full development between 6 and 8 years of age. This asset enables females to produce high-quality calves up to an advanced age of 18 years, and after rearing several calves, they provide remarkable added value in quality categories.

7

Calm character for easy management E bonolo e le motlhofo le go thokomelwa

Limousins have a relaxed and calm temperament making them easy and safe to work with.

8

Adapted to Botswana's conditions Ke kgomo e e kgonang go emelana le seemo sa bosa mo lefatsheng la Botswana.

The Limousin is very well adapted to diverse climates and conditions. Originating from France, the Limousin cattle evolved into a breed of unusual sturdiness, health, and adaptability due to the harsh pastoral and climatic conditions. In Africa, the breed is now farmed in feedlots and free-range conditions across Botswana, South Africa, Namibia, Zimbabwe, Zambia and Mozambique. At Leadwood, we successfully breed with them in the Tuli-Block and Sandveld area.

9

Tender, healthy beef for the health-conscious E nama ee monate e bile e siametse botsogo

The breed produces naturally lean beef, low in cholesterol and saturated fats, making it the ideal choice for the modern health-conscious consumer and export markets.

10

Registered Stud E mmele o o lekanetseng

You know what you buy! The Leadwood Limousin herd is registered with the Limousin Cattle Breeders Society of Southern Africa, which inspects each animal to ensure compliance with the breed standard.

DISCLAIMER

The Southern Africa Limousin GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by die breeders. Neither the Limousin Cattle Breeders' Society of South Africa; the Limousin Cattle Breeders' Society of Namibia nor the ABRI oversee or audit the collection of this data.

Why breed with Limousins?

Genetically more profitable

Invest in Limousin genetics and take advantage of the F94L muscling or “profit” gene present in Limousin cattle. This gene can get your beef herd producing up to:

- 19% more high value cuts
- 8% more in yield of retail cuts
- 6-11% more tenderness

...with no extra feed! ¹

What is the function of the myostatin gene?

The Myostatin gene is found in the DNA of all mammals. This gene produces a protein called Myostatin, where myo means “muscle”, and statin means “stop”. It influences the production of a protein that controls muscle development.

What is the F94L Gene?

Natural mutations of the gene produce proteins that are less effective at controlling muscle development, which results in increased muscle mass. There are three main mutations that occur within all Limousin populations. They are carried in pairs and differ in their effects as follows:

F94L

Animals possessing two copies of the F94L gene (F94L/F94L) can exhibit up to a 19% increase in muscling. Heterozygous animals (F94L/—), carrying one copy of the gene, also display enhanced muscling, though to a lesser extent. This gene is highly prevalent within the Limousin population.

What are the benefits of Myostatin?

Myostatin mutations in Limousins contributes to the following carcass traits:

- 1. Meat Yield:** The carcasses of double-muscled cattle dress out at between 65 and 70 percent due to a combination of increased muscle mass, reduced body fat, reduced bone mass and smaller internal organs. This is up to 19% higher than cattle without the gene.

The research conducted by the Adelaide University group led by Dr Wayne Pitchford has documented the effects of the Limousin muscling gene as shown below.

	Two copies of the gene	Zero copies of the gene	% Difference
Hot Carcase Weight	390.8kg	380.2kg	+3%
Weight Of Silverside	11.58kg	9.76kg	+19%
Eye Muscle Area	102.0 sq cm	86.1 sq cm	+19%

	Two copies of the gene	Zero copies of the gene	% Difference
Retail Beef Yield	73.4%	68.1%	+8%
Shear Force Of Loin Muscle*	4.06	4.30	-6%
Shear Force Of Silverside*	3.94	4.43	-11%

* lower shear force indicates more tender beef

- 2. Feed-efficiency:** Animals with two copies of the gene, consume the same amount of feed as animals with no copies of the gene, so they are much more feed-efficient in producing beef.
- 3. Meat Quality:** Meat from double-muscled cattle tends to be of better quality due to a combination of increased tenderness, reduced fat content and a higher proportion of polyunsaturated fats.

Significance for Producers: Double-muscled animals produce a higher proportion of desirable cuts of lean meat with greater efficiency than do comparable, conventional cattle. Therefore, the F94L gene is described as the ‘Profit Gene’ because you get more meat from your carcass naturally.

What are the disadvantages of the F94L gene?

There is no disadvantage to the F94L myostatin variant gene such as birth weight problems, calving ease, fertility, longevity and milk yield that are sometimes associated with other myostatin variants such as Variant nt821 and Q204X.

What is the benefit of cross-breeding?

In a nutshell: Much More Meat, Much More Profit!

When crossbreeding with Limousins, the progeny will inherit one copy of the gene and are expected to exhibit approximately half of the observed differences. A Limousin cross calf typically shows a 9.5% increase in silverside and eye muscle area, a 4% higher retail beef yield, a 3% improvement in loin muscle tenderness, and a 5.5% increase in silverside tenderness.

How should myostatin information be used when buying a bull?

Knowing what the genotypes of breeding stock are will help stud and commercial producers select animals for the best possible outcome. All animals of Leadwood’s Limousins undergo DNA profiling with Neogen’s GeneSeek® Genomic Profiler™ Bovine 100K SNP tests to assist in quantifying the genetic merit of cattle. The tests includes testing the Myostatin (MYO) status, parentage and various genetic conditions.

¹ Sellick, G., Pitchford, W., Morris, C., Cullen, N., Crawford, A., Raadsma, H., & Bottema, C. (2007). Effect of myostatin F94L on carcass yield in cattle. *Animal Genetics*, 38(5), 440-446.

AUCTION SALES CHECKLIST

- ✓ **Bulls** inoculated against Anthrax, Botulism & Black Quarter, Lumpy Skin and Pastuerella
- ✓ **Females** inoculated against Anthrax, Botulism & Black Quarter, Lumpy Skin and Pastuerella
- ✓ **All animals** are treated against internal and external parasites
- ✓ **All animals** were inspected and is approved by the Limousin Breeders Society of Southern Africa
- ✓ **Cows** are tested for pregnancy
- ✓ **All animals** are DNA profiled

Opmerkings/Remarks

Zippo is our herd sire based on his exceptional build, structural soundness, conformation, proven genetics, and lineage of stud bull-producing dams. He won a Bronze medal at the Champion of the World Competition 2024 (International Category) and a Gold Medal in the Asia/Africa/Oceania Category. He is a former South African record-priced bull and joint high-seller at the prestigious La Rhone Sale in 2021. It is the first available semen on the market from Zippo.

Golden SALE

LR18-87 ZIPPO

A Herd Sire with Distinction

For the first time, we are making **LR18-87 Zippo's** semen available on the market. Look out for his progeny on offer: two bull calves (Lot 3 & 20), two heifer calves (Lot 10 & 44), and eight pregnant females (Lot 15, 22, 24, 25, 33, 34,37 and 39).

LR18-87 Zippo is a former South African record priced bull and joint high-seller at the prestigious La Rhone Sale in 2021. Bred from an elite maternal line, his dam and granddam are both part of the La Rhone embryo donor program, with his greatgranddam also being the dam of LR Maserati - further cementing his lineage among the breed's elite.

Zippo is linebred eight times to Tarvis and five times to Dauphin, arguably the two most influential French sires in Limousin history. This deep-rooted pedigree ensures a strong genetic foundation for consistency, performance, and breed excellence.

Respected industry figures, including Martin Seyfferdt, Marius Barkhuizen, Willie de Jager, and Johan van der Nest, have praised Zippo as the ideal Limousin for Southern Africa—combining the right type and size with superior structural soundness and conformation.

At **Leadwood Limousins**, we selected Zippo as our herd sire for his exceptional build, structural soundness, conformation, proven genetics, and lineage of stud bull-producing dams. His influence continues to shape our breeding program with toptier progeny.

With Zippo leading our herd, Leadwood Limousins remains committed to breeding excellence, performance, and genetic superiority.

Opmerkings/Remarks

A well-muscled, broad-framed, smooth-coated cow sired by DK0999. She is carrying the proven strength and performance of the Hawker bloodline on the dam's side. She exhibits excellent structure, depth, and balance, making her a standout in any breeding program. Currently 6.5 months in calf to LR16-5 Vincent, a distinguished bull sired by Summit Payday. She offers a valuable genetic package with exceptional growth potential and maternal qualities. A promising investment for breeders seeking superior lineage and productivity.

SALE

Thank You!

Preparing for an auction takes a tremendous team effort, and we are grateful to everyone involved.

Thank you, all our fellow **Limousin breeders across the world**, our **stockmen friends**, as well as our **current and future clients**. We value your encouragement, support, enthusiasm and passion for the Golden Breed. Without you, we would not have a business, and there would not be an auction!

We appreciate all the effort from all our partners that made the Golden Sale possible: the **Stockman's Choice** team, **CDP Online Auctioneers**, **Gerry Morris** from **Vetswana**, **Monique van Vuuren** from the **Limousin Breeder's Society of Southern Africa**, **Tinus Havenga's FarmTalk** team as well as **Fanie & Annemarie Kotze**, our caterers.

We salute **Chris Herbst** and the **Supafeeds** team with their excellent service day and night, and their "make-a-plan" approach.

Finally, we give credit to our **Leadwood Limousin team** for their tireless efforts through rain and mud to prepare the animals and ensure everything is in place for the auction. Thank you, **Nico van Vuuren**, **Benny Buti**, **Speel Gabaleke**, **Maibe Galebotswe**, **Prince Mogale**, **Sunday Oamogeleng** and **Ilinde du Plessis**.

We hope you enjoy the day, and let's celebrate the Limousin journey together!

Limousin regards,
Jan & Manjo Stiglingh

Premium Nutrition for Growth, Fertility & Performance

The Limousin breed is celebrated for its exceptional muscling, feed efficiency, and superior carcass yield. To fully unlock these genetic advantages, high-quality nutrition is essential. That's where **SUPA FEEDS** comes in: precision-formulated feed designed to meet the unique demands of Limousin cattle at every stage of production.

With feed produced by our **Operations Manager, Mr Chris Herbst** at **SUPA FEEDS** we ensure consistent quality and performance-driven formulations that have been trusted by breeders, including Leadwood Limousins.

Precision Feeding for Every Stage

1 Growth & Development: Build a Solid Foundation

Calf Grower – High-protein ration designed to support weaned calves with optimal muscle and frame development, ensuring strong future breeding stock.

Beef Premium – A superior growing ration for young cattle, delivering high protein and energy for efficient weight gain while maintaining a lean, well-muscled frame.

2 Finishing: Maximize Weight & Carcass Yield

Beef Finisher – Balanced for high growth rates and superior meat quality, this feed ensures top-grade carcasses with excellent marbling and yield.

Bull Feed – A specialized ration for breeding bulls, supporting muscle maintenance, stamina, and fertility, ensuring optimal reproductive success.

3 Breeding & Maintenance: Support Herd Productivity

Winter Lick – A high-energy supplement formulated to maintain body condition during the nutrient-scarce winter months, ensuring breeding animals stay productive and healthy.

Production Lick – Designed for breeding cows and bulls, providing essential minerals and energy to boost fertility, milk production, and overall herd condition.

4 Adaptation to Harsh Conditions: Keep Cattle Thriving Year-Round

Drought Feed – When grazing is scarce, this carefully balanced ration provides sustained energy and protein, preventing weight loss and maintaining herd productivity in tough conditions.

Why Limousin Breeders Trust SUPA FEEDS

Quality Nutrition – Optimized for muscle growth, feed conversion, and reproductive success. Designed for Southern African conditions, providing balanced energy and protein to support growth in all seasons.

Consistent Quality – Formulated for Southern African conditions, ensuring cattle thrive in all seasons.

Invest in the Best – Choose SUPA FEEDS for your Limousins
